elvis.125.ma@gmail.com | [linkedin.com/in/elvislin125/](https://www.linkedin.com/in/elvislin125/) | github.com/ElvisLin125

Skills

Languages: JavaScript, TypeScript, Java, Python, SQL, HTML, CSS, Groovy

Frameworks: React, SpringBoot, Node.js, React Native, Expo, Express, PostgreSQL, GraphQL, Jest

Etc: AWS, Git, Github, Postman, Figma

Experience

Full-stack Software Engineer, Optum

Aug 2023 – Present

- Shipped **production features** for an internal developer platform used by dozens of teams, reducing duplicated effort and saving hundreds of engineering hours annually.
- Led implementation of a **module federation architecture**, enabling independent teams to integrate and deploy external apps into a unified platform without tight coupling.
- Implemented **token-based theming system**, allowing consistent, customizable styling across teams while reducing UI drift and rework.
- Increased unit and integration test coverage by **50%**, reducing regressions and improving release confidence.

Full-stack Developer Intern, SAP

Sep 2022 – Nov 2022

- Developed reusable React form components for a Microsoft Teams business framework, accelerating feature development for partner teams.
- Implemented configuration-driven form generation, enabling dynamic form creation without code changes.

Software Engineering Intern, UnitedHealth Group

June 2022 – Aug 2022

- Built an automated tool to validate SSL certificates across 4,300+ ESXi hosts, saving over 12 hours of effort per day.
- Integrated with VMware vROps and vCenter APIs to extract host and server metadata at scale.

Projects

Lead Engineer / Co-Founder - Fashion AI Platform

- Architected and built a mobile application from the ground up using React Native, focusing on performance, scalability, and clean component boundaries.
- Designed and prototyped MVP UI in Figma, establishing reusable design system to ensure visual consistency.
- Developed a reusable component library to ensure UI consistency and speed up feature iteration.
- Collaborated cross-functionally to define MVP scope, prioritize features, and ship early versions to users.

Hackathon Winner - Coin Game

- Built an interactive browser-based game allowing users to stimulate buy/sell mechanics through real-time input.
- Designed a dynamic in-game economy with risk-reward mechanics.
- Implemented responsive UI and custom styling with React and SASS, delivering a polished and engaging UX.

Education

University of California, Irvine – B.S. in Software Engineering

June 2023
